

Solar Underground Light

china solar underground light is made of ABS plastic, stainless steel .The work time are 8-10hours with fully charged.It can be used in multiple venues in Garden ,Lane Square and pathway.

Model:XLTD-1910

Product Description

The information of solar underground light

Solar panels: Monocrystal/polycrystal 2V 120MA

Lithium Battery: 1*1.2V AA 600mAh NI-MH battery

LED Type: 8*/12* white/warm LEDs

Material: plastic+ss constructure

Size: 12*12*13cm

Weight: 0.15kgs

The description of solar underground light:

- 1.Metal shell deformation and corrosion resistance.
- 2.Solar panels high photoelectric conversion efficiency.
- 3.reinforced pins insert into the ground the light body is not easy to tilt.
- 4.Soft glue switch key soft rubber waterproof protection switch does not enter water.

Installation notice

Do not install the ground light in this situation

1, Classroom

(sunshine will be blocked by the glass affect charge)

2. Monitor area

www.landsign.com

(monitor with the infrared ray will affect the light work)

3, Under the shadow

(can not be block with the tree and roof)

4. Short sunshine

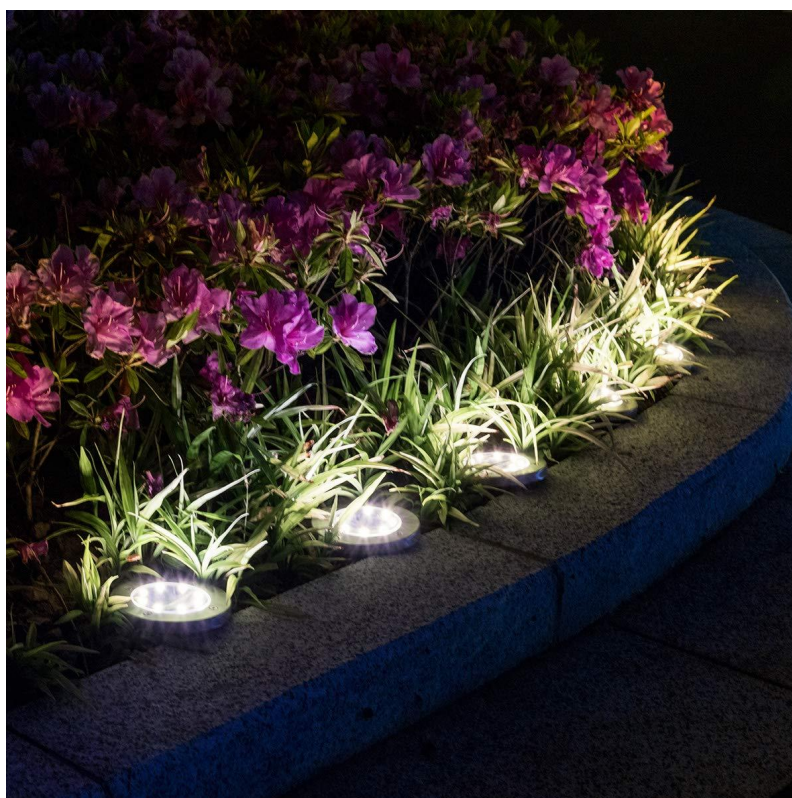

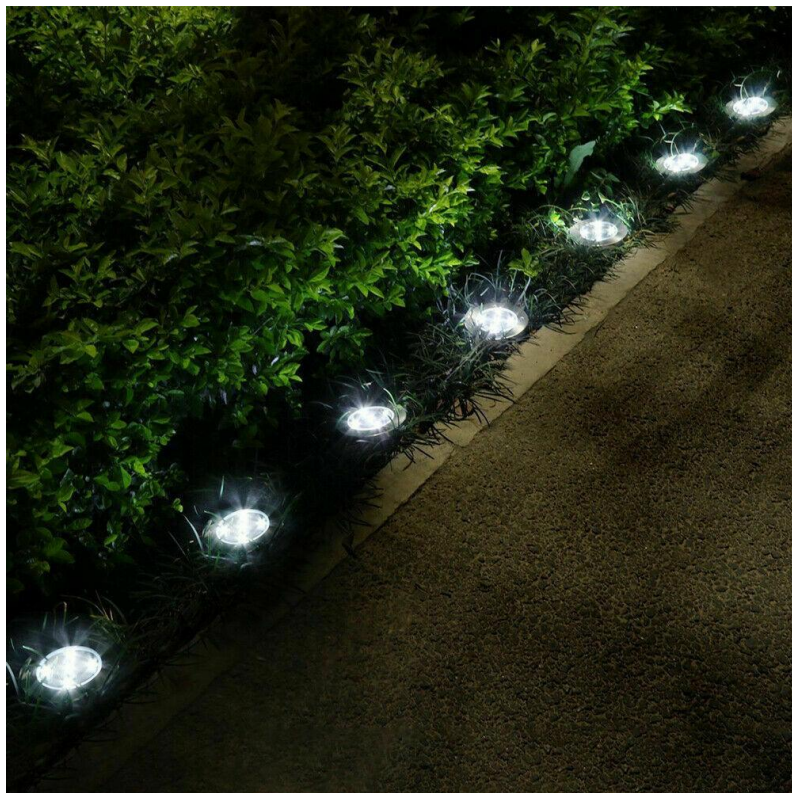

(must charge at least 7 hours)

The advantages of solar underground light

- Advantage of Solid Light---Wireless, Stainless, Waterproof and Durable design, great for outdoor
- Easy to be installed in-ground---It just need only 15~20 seconds to install the lights on your desire location with spike
- Solar Energy--- Efficient solar panel with built-in 400 mah rechargeable battery,,it can last 8-10 hrs after charged 6-8 hrs
- Light sensor for automatic working---First put switch on,it will automatically turn on in darkness and turn off when in daytime or bright area
- Product Size: Dia 4.72 inches for each
